

PLAYGROUND EQUIPMENT

All properties that have any type of play equipment will conduct inspections on this equipment monthly. This will include painting, cleaning, and making sure that all the equipment is operating in a safe manner. If at any time the equipment is not operating in a safe manner, maintenance is to repair immediately. If for any reason the equipment cannot be repaired at that time, that particular piece of equipment will not be in use. Under no circumstances is maintenance to alter (shortcuts, tape, wire, etc.) in any way the play equipment.

In conducting the inspection, maintenance will use form MA-10 to conduct this inspection. This inspection report will consist of the following: date the inspection was conducted, number of the inspection and year, time started and completed, and name of the inspector.

This inspection report will cover everything from proper amount of ground cover to nuts, bolts, and S-hooks. When the supervisor visits your property, a copy of this report will be required.
